Zhou, B.H., Solomonow, M., Baratta, R. and D'Ambrosia, R., Dynamic performance model of an isometric muscle–joint unit, 145

Subject Index

acceleration–deceleration
Doppler, periphery, vascular reactivity, 91
accuracy assessment
attitude, position, rigid body, 83
adaptive filter
EMG, microcontroller, muscle force, myoelectric control, 154
adaptive filters
ECG, FFT, Fourier series, Holter monitoring, data compression, electrocardiograph, 197
adaptive instrumentation
real-time digital signal processing, somatosensory evoked potential monitoring, spinal integrity monitoring, 248
adrenergic neurone
facilitation and inhibition of transmission, 3
aerosol
aerosol generator, inhalation therapy, 387
aerosol generator
aerosol, inhalation therapy, 387
algorithm
cardiotocography, fetal monitoring, intrauterine ECG, linear regression, 514
alignment
tibial loosening, total knee replacement, 182
ambulatory monitoring
EMG recording, physical activity, 410
amperometric biosensor
dynamic mode of operation, mathematical modelling, 471
ankle–foot orthosis
polypropylene, static analysis, stress analysis, 372
anode
bone regeneration, cathode, cathodic potential, electric stimulation, electrodes, interelectrode potential, osteogenesis, 337
area under curve (AUC)
compartmental model, enterohepatic circulation, reabsorption, 172
arrhythmia
cardioverter, defibrillator, electrodes, implantable, recognition, 96
arterial compliance
blood volume, electrical impedance, hypertension, peripheral circulation, 264
arthroscopy
cartilage, indentation, stiffness, 395
artificial neural network
(chronic physical) exercise, EEG power spectra, depression (rats), sleep-wake cycle, 579
atherosclerosis
cineangiography, controlled clinical trials, coronary, diagnostic image processing, quantitative angiography, randomized controlled trials, 356
atherosclerosis
excimer, femoral arteries, fluorescence spectroscopy, impulse response, time dependence, 595
attitude
accuracy assessment, position, rigid body, 83
auditory feedback
FES orthosis, gait restoration, sensory substitution, spinal cord injury, 507
Auerbach's plexus
enteric nervous network, mathematical modelling, synaptic interaction, 11
automated impedance matching
cardiac catheter ablation, high frequency, 36
autoregressive model
EEG signal analysis, autoregressive-moving average model, parametric method, testing parametric methods, 71
autoregressive model with exogenous inputs
event related potentials, ordinary least square method, scalp current density, 282
autoregressive-moving average model
EEG signal analysis, autoregressive model, parametric method, testing parametric methods, 71
back pressure
distensibility, measurement, peak flow, 462
back-scattered ultrasound
integrated back-scatter, myocardium architecture, regression analysis, 141
bending
compression, external fixator, sheep, tibia, transducer, 618
biomechanical model
dynamics, finger, hand, 54
biomechanical model
gait analysis, lumbosacral joint-centre, peak resultant loads, 27
biomechanics
intramedullary nailing, review, 323
biomechanics
THR, hip, micromotion, stability, stem, torsion, uncemented, 163
biomedical signals
discrete Fourier transform, time-frequency analysis, 455
bioprosthesis
collagen, crosslinking, denaturation, epoxide, glutaraldehyde, hydrothermal isometric tension, pericardium, shrinkage temperature, 115
birth
clinician-applied loading, end moment, force measurement, shoulder dystocia horizontal force, vertical force, 380
blood volume
arterial compliance, electrical impedance, hypertension, peripheral circulation, 264
bone cutting jig
fractures, olecranon, ulna, 111
bone regeneration
anode, cathode, cathodic potential, electric stimulation, electrodes, interelectrode potential, osteogenesis, 337
bone substitute
DP-bioglass, ultrasonic stimulation, 20
boundary fitted coordinate system
cast based modelling, computational fluid dynamics, ejection, finite volume method, heart, intracardiac blood flow, left ventricle, 602
brass instrumentalists
displacement transducer, force transducer, mouthpiece, strain gauge, tooth mobility, 567
CD pickup head
remote measurement, small displacements, 459
CT number
density, human bone, mechanical properties, 347
cancellous bone
elastic–plastic, finite element method, hip prosthesis, stress distribution, 544
cardiac catheter ablation
automated impedance matching, high frequency, 36
cardiac mechanics
left ventricular function, non-linear systems, phase-plane analysis, 46
cardiomyoplasty
FES, dynamic systems, muscle modelling, neural networks, radial basis functions, 431
cardiotocogram
fetal monitoring, microsoft windows, uterine activity integral, 42
cardiotocography
algorithm, fetal monitoring, intrauterine ECG, linear regression, 514
cardiovascular studies
circulatory assisted devices, circulatory system, time gating, 243
cardioverter
arrhythmia, defibrillator, electrodes, implantable, recognition, 96
cartilage
arthroscopy, indentation, stiffness, 395
cartilage
knee joint, localization, multichannel vibroarthrography, pathology, 583
cast based modelling
boundary fitted coordinate system, computational fluid dynamics, ejection, finite volume method, heart, intracardiac blood flow, left ventricle, 602
cathode
anode, bone regeneration, cathodic potential, electric stimulation, electrodes, interelectrode potential, osteogenesis, 337
cathodic potential
anode, bone regeneration, cathode, electric stimulation, electrodes, interelectrode potential, osteogenesis, 337
(chronic physical) exercise
EEG power spectra, artificial neural network, depression (rats), sleep-wake cycle, 579
cineangiography
atherosclerosis, controlled clinical trials, coronary, diagnostic image processing, quantitative angiography, randomized controlled trials, 356
circulation
dynamic characteristic, flow rate, power loss, pressure drop, prosthetic heart valve, 273
circulatory assisted devices
cardiovascular studies, circulatory system, time gating, 243
circulatory system
cardiovascular studies, circulatory assisted devices, time gating, 243
clinician-applied loading
birth, end moment, force measurement, shoulder dystocia horizontal force, vertical force, 380
collagen
bioprosthesis, crosslinking, denaturation, epoxide, glutaraldehyde, hydrothermal isometric tension, pericardium, shrinkage temperature, 115

collagen gel
dermal equivalent, indentation, skin equivalent, tensile properties, 537
compartmental model
area under curve (AUC), enterohepatic circulation, reabsorption, 172
compression
bending, external fixator, sheep, tibia, transducer, 618
computational fluid dynamics
boundary fitted coordinate system, cast based modelling, ejection, finite volume method, heart, intracardiac blood flow, left ventricle, 602
computational fluid dynamics
fluid–structure interaction, microcirculation, particle suspensions, 609
computer simulation
epicardial break-through, epicardial potentials, left bundle branch block, 625
conduit-mounted prosthetic heart valves
in vitro, 497
constitutive equations
Langer cleavage lines, human skin, multiaxial tests, two-dimensional stress analysis, 304
controlled clinical trials
atherosclerosis, cineangiography, coronary, diagnostic image processing, quantitative angiography, randomized controlled trials, 356
coronary
atherosclerosis, cineangiography, controlled clinical trials, diagnostic image processing, quantitative angiography, randomized controlled trials, 356
crosslinking
bioprosthesis, collagen, denaturation, epoxide, glutaraldehyde, hydrothermal isometric tension, pericardium, shrinkage temperature, 115
cutaneous afferents
FES, FNS, feedback control, functional neuromuscular stimulation, neuroprostheses, 481
Doppler
acceleration–deceleration, periphery, vascular reactivity, 91
Doppler ultrasound
physiological signal processing, transputer, 403
DP-bioglass
bone substitute, ultrasonic stimulation, 20
data acquisition
electromyography, muscle fibres, parallel computer, surface EMG, surface electrodes, 442
data collection
foetal ECG, 122
data compression
ECG, FFT, Fourier series, Holter monitoring, adaptive filters, electrocardiograph, 197
defibrillator
arrhythmia, cardioverter, electrodes, implantable, recognition, 96
denaturation
bioprosthesis, collagen, crosslinking, epoxide, glutaraldehyde, hydrothermal isometric tension, pericardium, shrinkage temperature, 115
density
CT number, human bone, mechanical properties, 347
depression (rats)
(chronic physical) exercise, EEG power spectra, artificial neural network, sleep-wake cycle, 579
dermal equivalent
collagen gel, indentation, skin equivalent, tensile properties, 537
detector array
inverse source imaging procedure, magnetic resonance imaging, 257
diagnostic image processing
atherosclerosis, cineangiography, controlled clinical trials, coronary, quantitative angiography, randomized controlled trials, 356
discrete Fourier transform
biomedical signals, time-frequency analysis, 455
displacement transducer
brass instrumentalists, force transducer, mouthpiece, strain gauge, tooth mobility, 567
distensibility
back pressure, measurement, peak flow, 462
dynamic characteristic
circulation, flow rate, power loss, pressure drop, prosthetic heart valve, 273
dynamic mode of operation
amperometric biosensor, mathematical modelling, 471
dynamics
biomechanical model, finger, hand, 54
dynamic systems
FES, cardiomyoplasty, muscle modelling, neural networks, radial basis functions, 431
ECG
FFT, Fourier series, Holter monitoring, adaptive filters, data compression, electrocardiograph, 197
ECG analysis
greater arrhythmogenic right ventricular disease, late potentials, 232
EEG power spectra
(chronic physical) exercise, artificial neural network, depression (rats), sleep-wake cycle, 579
EEG signal analysis
autoregressive model, autoregressive-moving average model, parametric method, testing parametric methods, 71
EEG signal analysis
electric dipole model, spite focus localization, 64
EMG
adaptive filter, microcontroller, muscle force, myoelectric control, 154
EMG recording
ambulatory monitoring, physical activity, 410
echography
testis, texture analysis, 523
ejection
boundary fitted coordinate system, cast based modelling, computational fluid dynamics, finite volume method, heart, intracardiac blood flow, left ventricle, 602
elastic–plastic
cancellous bone, finite element method, hip prosthesis, stress distribution, 544
electrical impedance
arterial compliance, blood volume, hypertension, peripheral circulation, 264
electrical stimulation
joint, muscle, neuroprosthesis, 145
electric dipole model
EEG signal analysis, spite focus localization, 64
electric stimulation
anode, bone regeneration, cathode, cathodic potential, electrodes, interelectrode potential, osteogenesis, 337
electric stimulation
equipment design, evaluation studies, muscle contraction, transcutaneous nerve stimulation, 314
electrocardiogram
fetal heart rate, fetal monitoring, matched filters, signal detection, 188
electrocardiograph
ECG, FFT, Fourier series, Holter monitoring, adaptive filters, data compression, 197
electrodes
anode, bone regeneration, cathode, cathodic potential, electric stimulation, interelectrode potential, osteogenesis, 337
electrodes
arrhythmia, cardioverter, defibrillator, implantable, recognition, 96
electrogastrogram
gastric motility, neural networks, signal processing, stomach, 219
electromyography
data acquisition, muscle fibres, parallel computer, surface EMG, surface electrodes, 442
end moment
birth, clinician-applied loading, force measurement, shoulder dystocia horizontal force, vertical force, 380
enteric nervous network
Auerbach's plexus, mathematical modelling, synaptic interaction, 11
enterohepatic circulation
area under curve (AUC), compartmental model, reabsorption, 172
enzyme electrode
Nafion®, glucose, interference, 416
epicardial break-through
computer simulation, epicardial potentials, left bundle branch block, 625
computer simulation, epicardial break-through, left bundle branch block, 625
epoxide
bioprosthesis, collagen, crosslinking, denaturation, glutaraldehyde, hydrothermal isometric tension, pericardium, shrinkage temperature, 115
equipment design
electric stimulation, evaluation studies, muscle contraction, transcutaneous nerve stimulation, 314
evaluation studies
electric stimulation, equipment design, muscle contraction, transcutaneous nerve stimulation, 314
event-related potential
P300 in children, morphological filter, single sweep records, 425
event related potentials
autoregressive model with exogenous inputs, ordinary least square method, scalp current density, 282
excimer
atherosclerosis, femoral arteries, fluorescence spectroscopy, impulse response, time dependence, 595
external fixator
bending, compression, sheep, tibia, transducer, 618
FES
cardiomyoplasty, dynamic systems, muscle modelling, neural networks, radial basis functions, 431
FES
FNS, cutaneous afferents, feedback control, functional neuromuscular stimulation, neuroprostheses, 481
FES orthosis
auditory feedback, gait restoration, sensory substitution, spinal cord injury, 507
FFT
ECG, Fourier series, Holter monitoring, adaptive filters, data compression, electrocardiograph, 197

FNS
FES, cutaneous afferents, feedback control, functional neuromuscular stimulation, neuroprostheses, 481
facilitation and inhibition of transmission
adrenergic neurone, 3
feedback control
FES, FNS, cutaneous afferents, functional neuromuscular stimulation, neuroprostheses, 481
femoral arteries
atherosclerosis, excimer, fluorescence spectroscopy, impulse response, time dependence, 595
fetal heart rate
electrocardiogram, fetal monitoring, matched filters, signal detection, 188
fetal monitoring
algorithm, cardiotocography, intrauterine ECG, linear regression, 514
fetal monitoring
cardiotocogram, Microsoft® Windows™, uterine activity integral, 42
fetal monitoring
electrocardiogram, fetal heart rate, matched filters, signal detection, 188
finger
biomechanical model, dynamics, hand, 54
finite element analysis
stem length, uncemented endoprostheses, 291
finite element method
cancellous bone, elastic–plastic, hip prosthesis, stress distribution, 544
finite element method (FEM)
3D trabecular bone structure, mechanical bone properties, non-invasive bone biopsy, quantitative computed tomography (QCT), 126
finite element model
friction, interface stress, prosthesis, slip, 559
finite element
Stokes equations, intestinal peristalsis, model, 204
finite volume method
boundary fitted coordinate system, cast based modelling, computational fluid dynamics, ejection, heart, intracardiac blood flow, left ventricle, 602
flow rate
circulation, dynamic characteristic, power loss, pressure drop, prosthetic heart valve, 273
fluid–structure interaction
computational fluid dynamics, microcirculation, particle suspensions, 609
fluorescence spectroscopy
atherosclerosis, excimer, femoral arteries, impulse response, time dependence, 595
foetal ECG
data collection, 122
force measurement
birth, clinician-applied loading, end moment, shoulder dystocia horizontal force, vertical force, 380
force transducer
brass instrumentalists, displacement transducer, mouthpiece, strain gauge, tooth mobility, 567
Fourier series
ECG, FFT, Holter monitoring, adaptive filters, data compression, electrocardiograph, 197
fractures
bone cutting jig, olecranon, ulna, 111
friction
finite element model, interface stress, prosthesis, slip, 559
functional neuromuscular stimulation
FES, FNS, cutaneous afferents, feedback control, neuroprostheses, 481
functional neuromuscular stimulation
grasp restoration, rehabilitation, sensors, 466
gait
hemiplegia, insoles, temporal parameters, 390
gait analysis
biomechanical model, lumbosacral joint-centre, peak resultant loads, 27
gait restoration
FES orthosis, auditory feedback, sensory substitution, spinal cord injury, 507
gamma camera
medical imaging, neural networks, 366
gastric motility
electrogastrogram, neural networks, signal processing, stomach, 219
glucose
Nafion®, enzyme electrode, interference, 416
glutaraldehyde
bioprosthesis, collagen, crosslinking, denaturation, epoxide, hydrothermal isometric tension, pericardium, shrinkage temperature, 115
grasp restoration
functional neuromuscular stimulation, rehabilitation, sensors, 466
greater arrhythmogenic right ventricular disease
ECG analysis, late potentials, 232
haemodilution
haemorrhage, mathematical model, transcapillary refill, 215
haemorrhage
haemodilution, mathematical model, transcapillary refill, 215
hand
biomechanical model, dynamics, finger, 54
heart
boundary fitted coordinate system, cast based modelling, computational fluid dynamics, ejection, finite volume method, intracardiac blood flow, left ventricle, 602
hemiplegia
gait, insoles, temporal parameters, 390
high frequency
automated impedance matching, cardiac catheter ablation, 36
hip
THR, biomechanics, micromotion, stability, stem, torsion, uncemented, 163
hip prosthesis
cancellous bone, elastic–plastic, finite element method, stress distribution, 544
Holter monitoring
ECG, FFT, Fourier series, adaptive filters, data compression, electrocardiograph, 197
home monitoring
neural networks, oxygenation, respiration, sudden infant death syndrome, 551
hospital communications
UHF signalling, radio path fading, radio telemetry, 226
human bone
CT number, density, mechanical properties, 347
human skin
Langer cleavage lines, constitutive equations, multiaxial tests, two-dimensional stress analysis, 304
hydrothermal isometric tension
bioprosthesis, collagen, crosslinking, denaturation, epoxide, glutaraldehyde, pericardium, shrinkage temperature, 115
hypertension
arterial compliance, blood volume, electrical impedance, peripheral circulation, 264
implantable
arrhythmia, cardioverter, defibrillator, electrodes, recognition, 96
impulse response
atherosclerosis, excimer, femoral arteries, fluorescence spectroscopy, time dependence, 595
indentation
arthroscopy, cartilage, stiffness, 395
indentation
collagen gel, dermal equivalent, skin equivalent, tensile properties, 537
inhalation therapy
aerosol generator, aerosol, 387
insoles
gait, hemiplegia, temporal parameters, 390
integrated back-scatter
back-scattered ultrasound, myocardium architecture, regression analysis, 141
intensity
photoplethysmography, sample volume, wavelength, 571
interelectrode potential
anode, bone regeneration, cathode, cathodic potential, electric stimulation, electrodes, osteogenesis, 337
interface stress
finite element model, friction, prosthesis, slip, 559
interference
Nafion®, enzyme electrode, glucose, 416
intestinal peristalsis
Stokes equations, finite element, model, 204
intracardiac blood flow
boundary fitted coordinate system, cast based modelling, computational fluid dynamics, ejection, finite volume method, heart, left ventricle, 602
intramedullary nailing
biomechanics, review, 323
intrauterine ECG
algorithm, cardiotocography, fetal monitoring, linear regression, 514
inverse source imaging procedure
detector array, magnetic resonance imaging, 257
in vitro
conduit-mounted prosthetic heart valves, 497
iontophoresis
stimulator, transdermal drug delivery, 385
joint
electrical stimulation, muscle, neuroprosthesis, 145
kinematics
mathematical modelling, thumb mechanics, 297
knee joint
cartilage, localization, multichannel vibroarthrography, pathology, 583
Langer cleavage lines
constitutive equations, human skin, multiaxial tests, two-dimensional stress analysis, 304
late potentials
ECG analysis, greater arrhythmogenic right ventricular disease, 232
left bundle branch block
computer simulation, epicardial breakthrough, epicardial potentials, 625
left ventricle
boundary fitted coordinate system, cast based modelling, computational fluid dynamics, ejection, finite volume method, heart, intracardiac blood flow, 602
left ventricular function
cardiac mechanics, non-linear systems, phase-plane analysis, 46
linear regression
algorithm, cardiotocography, fetal monitoring, intrauterine ECG, 514

localization
cartilage, knee joint, multichannel vibroarthrography, pathology, 583
lumbosacral joint-centre
biomechanical model, gait analysis, peak resultant loads, 27
lymphatic system
mathematical model, terminal lymphatics, 134
magnetic resonance imaging
detector array, inverse source imaging procedure, 257
matched filters
electrocardiogram, fetal heart rate, fetal monitoring, signal detection, 188
mathematical model
haemodilution, haemorrhage, transcapillary refill, 215
mathematical model
lymphatic system, terminal lymphatics, 134
mathematical model
maximum expiratory flow-volume, 332
mathematical modelling
amperometric biosensor, dynamic mode of operation, 471
mathematical modelling
Auerbach's plexus, enteric nervous network, synaptic interaction, 11
mathematical modelling
kinematics, thumb mechanics, 297
mathematical modelling
sensitivity analysis, urea kinetics, 177
maximum expiratory flow-volume
mathematical model, 332
measurement
back pressure, distensibility, peak flow, 462
mechanical bone properties
3D trabecular bone structure, finite element method (FEM), non-invasive bone biopsy, quantitative computed tomography (QCT), 126
mechanical properties
CT number, density, human bone, 347
medical imaging
gamma camera, neural networks, 366
microcirculation
computational fluid dynamics, fluid–structure interaction, particle suspensions, 609
microcontroller
EMG, adaptive filter, muscle force, myoelectric control, 154
micromotion
THR, biomechanics, hip, stability, stem, torsion, uncemented, 163
Microsoft® windows™
cardiotocogram, fetal monitoring, uterine activity integral, 42
model
Stokes equations, finite element, intestinal peristalsis, 204
morphological filter
P300 in children, event-related potential, single sweep records, 425
mouthpiece
brass instrumentalists, displacement transducer, force transducer, strain gauge, tooth mobility, 567
multiaxial tests
Langer cleavage lines, constitutive equations, human skin, two-dimensional stress analysis, 304
multichannel vibroarthrography
cartilage, knee joint, localization, pathology, 583
muscle
electrical stimulation, joint, neuroprosthesis, 145
muscle contraction
electric stimulation, equipment design, evaluation studies, transcutaneous nerve stimulation, 314
muscle fibres
data acquisition, electromyography, parallel computer, surface EMG, surface electrodes, 442
muscle force
EMG, adaptive filter, microcontroller, myoelectric control, 154
muscle force
muscle moment arm, muscle stress, physiological cross-sectional area (PCSA), specific tension, 529
muscle modelling
FES, cardiomyoplasty, dynamic systems, neural networks, radial basis functions, 431
muscle moment arm
muscle force, muscle stress, physiological cross-sectional area (PCSA), specific tension, 529
muscle stress
muscle force, muscle moment arm, physiological cross-sectional area (PCSA), specific tension, 529
myocardium architecture
back-scattered ultrasound, integrated back-scatter, regression analysis, 141
myoelectric control
EMG, adaptive filter, microcontroller, muscle force, 154
Nafion®
enzyme electrode, glucose, interference, 416
neural networks
electrogastrogram, gastric motility, signal processing, stomach, 219
neural networks
FES, cardiomyoplasty, dynamic systems, muscle modelling, radial basis functions, 431
neural networks
gamma camera, medical imaging, 366
neural networks
home monitoring, oxygenation, respiration, sudden infant death syndrome, 551
neuroprostheses
FES, FNS, cutaneous afferents, feedback control, functional neuromuscular stimulation, 481
neuroprosthesis
electrical stimulation, joint, muscle, 145
non-invasive bone biopsy
3D trabecular bone structure, finite element method (FEM), mechanical bone properties, quantitative computed tomography (QCT), 126
non-linear systems
cardiac mechanics, left ventricular function, phase-plane analysis, 46
olecranon
bone cutting jig, fractures, ulna, 111
ordinary least square method
autoregressive model with exogenous inputs, event related potentials, scalp current density, 282
osteogenesis
anode, bone regeneration, cathode, cathodic potential, electric stimulation, electrodes, interelectrode potential, 337
oxygenation
home monitoring, neural networks, respiration, sudden infant death syndrome, 551
P300 in children
event-related potential, morphological filter, single sweep records, 425
parallel computer
data acquisition, electromyography, muscle fibres, surface EMG, surface electrodes, 442
parametric method
EEG signal analysis, autoregressive model, autoregressive-moving average model, testing parametric methods, 71
particle suspensions
computational fluid dynamics, fluid–structure interaction, microcirculation, 609
pathology
cartilage, knee joint, localization, multichannel vibroarthrography, 583
peak flow
back pressure, distensibility, measurement, 462
peak resultant loads
biomechanical model, gait analysis, lumbosacral joint-centre, 27
pericardium
bioprosthesis, collagen, crosslinking, denaturation, epoxide, glutaraldehyde, hydrothermal isometric tension, shrinkage temperature, 115
peripheral circulation
arterial compliance, blood volume, electrical impedance, hypertension, 264
periphery
Doppler, acceleration–deceleration, vascular reactivity, 91
phase-plane analysis
cardiac mechanics, left ventricular function, non-linear systems, 46
photoplethysmography
intensity, sample volume, wavelength, 571
physical activity
EMG recording, ambulatory monitoring, 410
physiological cross-sectional area (PCSA)
muscle force, muscle moment arm, muscle stress, specific tension, 529
physiological signal processing
Doppler ultrasound, transputer, 403
pigmentation
reflectance spectrophotometry, skin, 104
polypropylene
ankle–foot orthosis, static analysis, stress analysis, 372
position
accuracy assessment, attitude, rigid body, 83
power loss
circulation, dynamic characteristic, flow rate, pressure drop, prosthetic heart valve, 273
pressure drop
circulation, dynamic characteristic, flow rate, power loss, prosthetic heart valve, 273
prosthesis
finite element model, friction, interface stress, slip, 559
prosthetic heart valve
circulation, dynamic characteristic, flow rate, power loss, pressure drop, 273
quantitative angiography
atherosclerosis, cineangiography, controlled clinical trials, coronary, diagnostic image processing, randomized controlled trials, 356
quantitative computed tomography (QCT)
3D trabecular bone structure, finite element method (FEM), mechanical bone properties, non-invasive bone biopsy, 126
radial basis functions
FES, cardiomyoplasty, dynamic systems, muscle modelling, neural networks, 431
radio path fading
UHF signalling, hospital communications, radio telemetry, 226
radio telemetry
UHF signalling, hospital communications, radio path fading, 226
randomized controlled trials
atherosclerosis, cineangiography, controlled clinical trials, coronary, diagnostic image processing, quantitative angiography, 356

reabsorption
area under curve (AUC), compartmental model, enterohepatic circulation, 172
real-time digital signal processing
adaptive instrumentation, somatosensory evoked potential monitoring, spinal integrity monitoring, 248
recognition
arrhythmia, cardioverter, defibrillator, electrodes, implantable, 96
reflectance spectrophotometry
pigmentation, skin, 104
regression analysis
back-scattered ultrasound, integrated back-scatter, myocardium architecture, 141
rehabilitation
functional neuromuscular stimulation, grasp restoration, sensors, 466
remote measurement
CD pickup head, small displacements, 459
respiration
home monitoring, neural networks, oxygenation, sudden infant death syndrome, 551
review
biomechanics, intramedullary nailing, 323
rigid body
accuracy assessment, attitude, position, 83
sample volume
intensity, photoplethysmography, wavelength, 571
scalp current density
autoregressive model with exogenous inputs, event related potentials, ordinary least square method, 282
sensitivity analysis
mathematical modelling, urea kinetics, 177
sensors
functional neuromuscular stimulation, grasp restoration, rehabilitation, 466
sensory substitution
FES orthosis, auditory feedback, gait restoration, spinal cord injury, 507
sheep
bending, compression, external fixator, tibia, transducer, 618
shoulder dystocia horizontal force
birth, clinician-applied loading, end moment, force measurement, vertical force, 380
shrinkage temperature
bioprosthesis, collagen, crosslinking, denaturation, epoxide, glutaraldehyde, hydrothermal isometric tension, pericardium, 115
signal detection
electrocardiogram, fetal heart rate, fetal monitoring, matched filters, 188
signal processing
electrogastrogram, gastric motility, neural networks, stomach, 219
single sweep records
P300 in children, event-related potential, morphological filter, 425
skin equivalent
collagen gel, dermal equivalent, indentation, tensile properties, 537
skin
pigmentation, reflectance spectrophotometry, 104
sleep–wake cycle
(chronic physical) exercise, EEG power spectra, artificial neural network, depression (rats), 579
slip
finite element model, friction, interface stress, prosthesis, 559
small displacements
CD pickup head, remote measurement, 459
somatosensory evoked potential monitoring
adaptive instrumentation, real-time digital signal processing, spinal integrity monitoring, 248
specific tension
muscle force, muscle moment arm, muscle stress, physiological cross-sectional area (PCSA), 529
spinal cord injury
FES orthosis, auditory feedback, gait restoration, sensory substitution, 507
spinal integrity monitoring
adaptive instrumentation, real-time digital signal processing, somatosensory evoked potential monitoring, 248
spite focus localization
EEG signal analysis, electric dipole model, 64
stability
THR, biomechanics, hip, micromotion, stem, torsion, uncemented, 163
static analysis
ankle–foot orthosis, polypropylene, stress analysis, 372
stem
THR, biomechanics, hip, micromotion, stability, torsion, uncemented, 163
stem length
finite element analysis, uncemented endoprostheses, 291
stiffness
arthroscopy, cartilage, indentation, 395
stimulator
iontophoresis, transdermal drug delivery, 385
Stokes equations
finite element, intestinal peristalsis, model, 204
stomach
electrogastrogram, gastric motility, neural networks, signal processing, 219
strain gauge
brass instrumentalists, displacement transducer, force transducer, mouthpiece, tooth mobility, 567
stress analysis
ankle–foot orthosis, polypropylene, static analysis, 372
stress distribution
cancellous bone, elastic–plastic, finite element method, hip prosthesis, 544
sudden infant death syndrome
home monitoring, neural networks, oxygenation, respiration, 551
surface electrodes
data acquisition, electromyography, muscle fibres, parallel computer, surface EMG, 442
surface EMG
data acquisition, electromyography, muscle fibres, parallel computer, surface electrodes, 442
synaptic interaction
Auerbach's plexus, enteric nervous network, mathematical modelling, 11
temporal parameters
gait, hemiplegia, insoles, 390
tensile properties
collagen gel, dermal equivalent, indentation, skin equivalent, 537
terminal lymphatics
lymphatic system, mathematical model, 134
testing parametric methods
EEG signal analysis, autoregressive model, autoregressive-moving average model, parametric method, 71
testis
echography, texture analysis, 523
texture analysis
echography, testis, 523
THR
biomechanics, hip, micromotion, stability, stem, torsion, uncemented, 163
3D trabecular bone structure
finite element method (FEM), mechanical bone properties, non-invasive bone biopsy, quantitative computed tomography (QCT), 126
thumb mechanics
kinematics, mathematical modelling, 297
tibia
bending, compression, external fixator, sheep, transducer, 618
tibial loosening
alignment, total knee replacement, 182
time dependence
atherosclerosis, excimer, femoral arteries, fluorescence spectroscopy, impulse response, 595
time-frequency analysis
biomedical signals, discrete Fourier transform, 455
time gating
cardiovascular studies, circulatory assisted devices, circulatory system, 243
tooth mobility
brass instrumentalists, displacement transducer, force transducer, mouthpiece, strain gauge, 567
torsion
THR, biomechanics, hip, micromotion, stability, stem, uncemented, 163
total knee replacement
alignment, tibial loosening, 182
transcapillary refill
haemodilution, haemorrhage, mathematical model, 215
transcutaneous nerve stimulation
electric stimulation, equipment design, evaluation studies, muscle contraction, 314
transdermal drug delivery
iontophoresis, stimulator, 385
transducer
bending, compression, external fixator, sheep, tibia, 618
transputer
Doppler ultrasound, physiological signal processing, 403
two-dimensional stress analysis
Langer cleavage lines, constitutive equations, human skin, multiaxial tests, 304
UHF signalling
hospital communications, radio path fading, radio telemetry, 226
ulna
bone cutting jig, fractures, olecranon, 111
ultrasonic stimulation
DP-bioglass, bone substitute, 20
uncemented
THR, biomechanics, hip, micromotion, stability, stem, torsion, 163
uncemented endoprostheses
finite element analysis, stem length, 291
urea kinetics
mathematical modelling, sensitivity analysis, 177
uterine activity integral
cardiotocogram, fetal monitoring, microsoft windows, 42
vascular reactivity
Doppler, acceleration–deceleration, periphery, 91
vertical force
birth, clinician-applied loading, end moment, force measurement, shoulder dystocia horizontal force, 380
wavelength
intensity, photoplethysmography, sample volume, 571
